If installing the device indoors, please keep device at least 2 meters away from light, and at least 3 meters away from window and door.

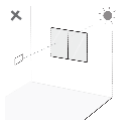

Backlight

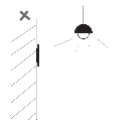

Direct sunlight

Direct sun through window

Indirect sunlight through window

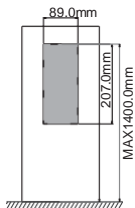

Close to light

## Flush-mounting Installation

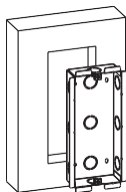

### Step 1: Flush-mounting Box Installation

#### 1. Normal Installation

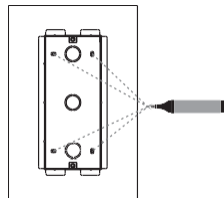

Cut a rectangular hole on the wall of

the diameter of 89x207 mm and depth the hole of 40 mm that can accommodate and throughout all necessary cables.

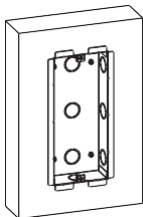

Insert the flush-mounting box into

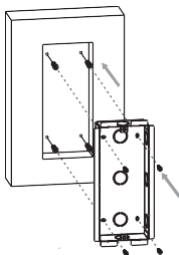

Mark the four holes of the

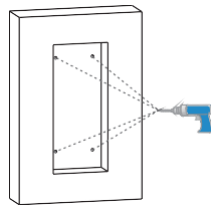

flush-mounting box on the wall.

Finish the flush-mounting box installation.

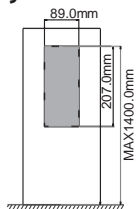

Insert four plastic wall anchors into the hole you drilled before. Fix the flush-mounting box with four ST4x20 screws.

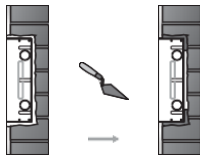

Take down the flush-mounting box and drill (5 mm drill bit required) the four marked fixing holes on the wall with a depth of 25 mm.

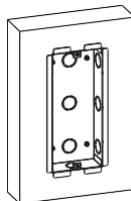

## 2. Or you can choose another simple method without fixing ST4x20 screws

Cut a rectangular hole in the wall of the diameter of 89x207 mm and depth of 40 mm that can accommodate and throughout all necessary cables.

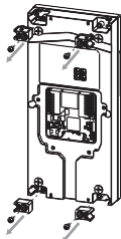

Use cement or non-corrosive structural adhesives to fill the gap between the wall and flush-mounting box. Wait the adhesive material desiccation, go to the next step.

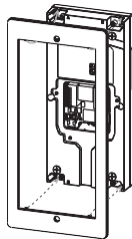

Finish the flush-mounting box installation.

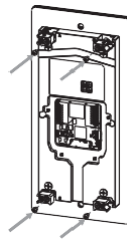

## Step2 : Flush-mounting bracket installation

Unscrew the screws and remove the four A/B fixing blocks on the back of the device.

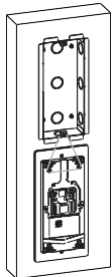

Insert the four bumps of the flush-mounting bracket into the 4 grooves on the back of the device (the foam side faces people).

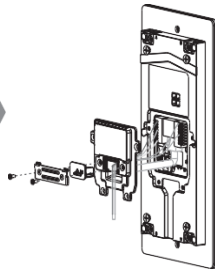

Reinstall the removed fixing blocks back to their original position (A to A, B to B).

## Step3 : Back Cover Installation

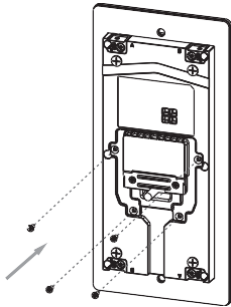

For convenient wiring, hang XT-12P on the flush-mounting box with rope.

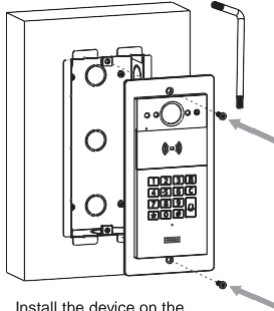

Make cables go through the back cover, connecting to the corresponding interfaces of the main board. Select a suitable size rubber plug to push all the cables into the back cover. Fix cable locking plate to the back cover with two M2.5x6 screws.

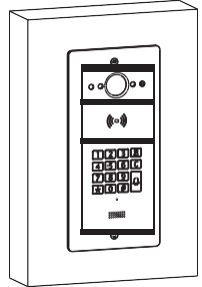

Note: In the case of less than 6 signal cables, use S-size rubber plugs. In the case of 7 to 10 signal cables, use M-size rubber plugs. When there are more than 11 signal cables Please use L-size wiring rubber plug.

Fasten the back cover with four M2.5x6 screws.

Install the device on the flush-mounting box using two M4x15 Torx screws.

Installation completed.
